Home, Smart Home!

Products

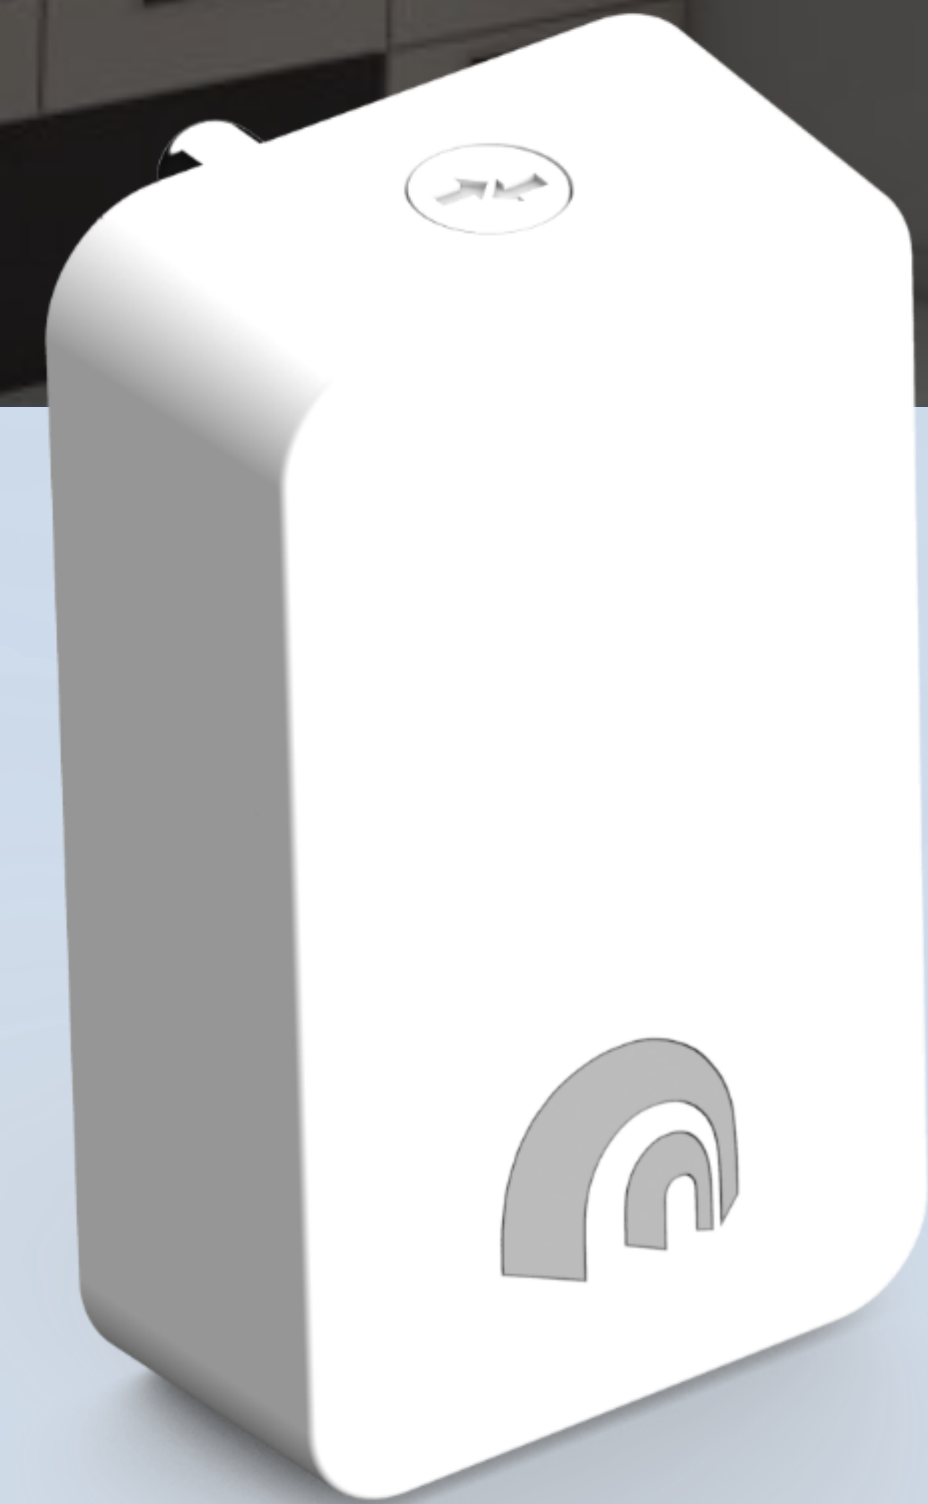

eGlu Hub

eGlu HUB is the Home Automation Controller that communicates to all eGlu devices installed at home. A small, elegant, yet powerful device that fits perfectly to your décor.

Motion Sensor

Motion Sensor or PIR Sensor detects human movement and is powered with battery. It can be used for intrusion or to detect unoccupancy in a room.

Door Sensor

Door Sensor is a multifunctional battery powered device. It can function as a Door Sensor or as a Presence Sensor or as a Panic Button.

Panic Alarm

Panic Alarm makes sound when turned on and is powered with battery.

In-wall switch

In-wall Switch Module allows automation of lights, fans, power sockets etc and high power devices like AC's, geysers etc. The dimmers lets to control the lighting intensity for for a perfect ambience.

RGB LED Driver

RGB led driver can control the colour and brightness of connected RGB light. It lets you create different colour themes for mood lighting.

Smart Plugs

Smart Plugs 6A & 16A converts existing wall socket into a smart switch. Any appliance like water filter, lamps, geysers etc can connected and scheduled to operate at preset time.

In-wall Switch 16 A

In-wall switch 16A can be used to automate high power appliances and works in parallel with the high power mechanical switch. It lets you schedule your high power appliances like geysers, AC's, water pumps etc to operate at pre defined time.

IR Transmitter

The World's First IR Blaster that operates on a AA Battery. eGlu's IR Transmitter is a classic retrofit IR control device that can be stuck to the wall and can control all your appliances like AC, TV, Set-top Box, DVD Player, Music System etc with the mobile app or with voice assistants.

Curtain Controller

eGlu Curtain control automates curtains, projectors etc and lets you control those with the app or with voice. It can work in parallel with the manual switches for your curtains and projectors.

Gate Controller

- eGlu Gate Controller lets you control your motorized gates from anywhere and gives the convenience of opening the gates just before you reach home.

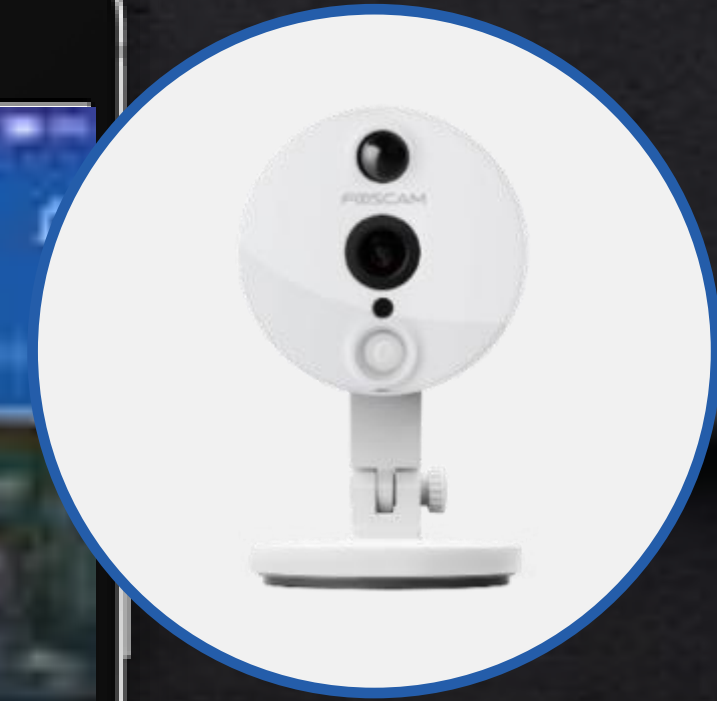

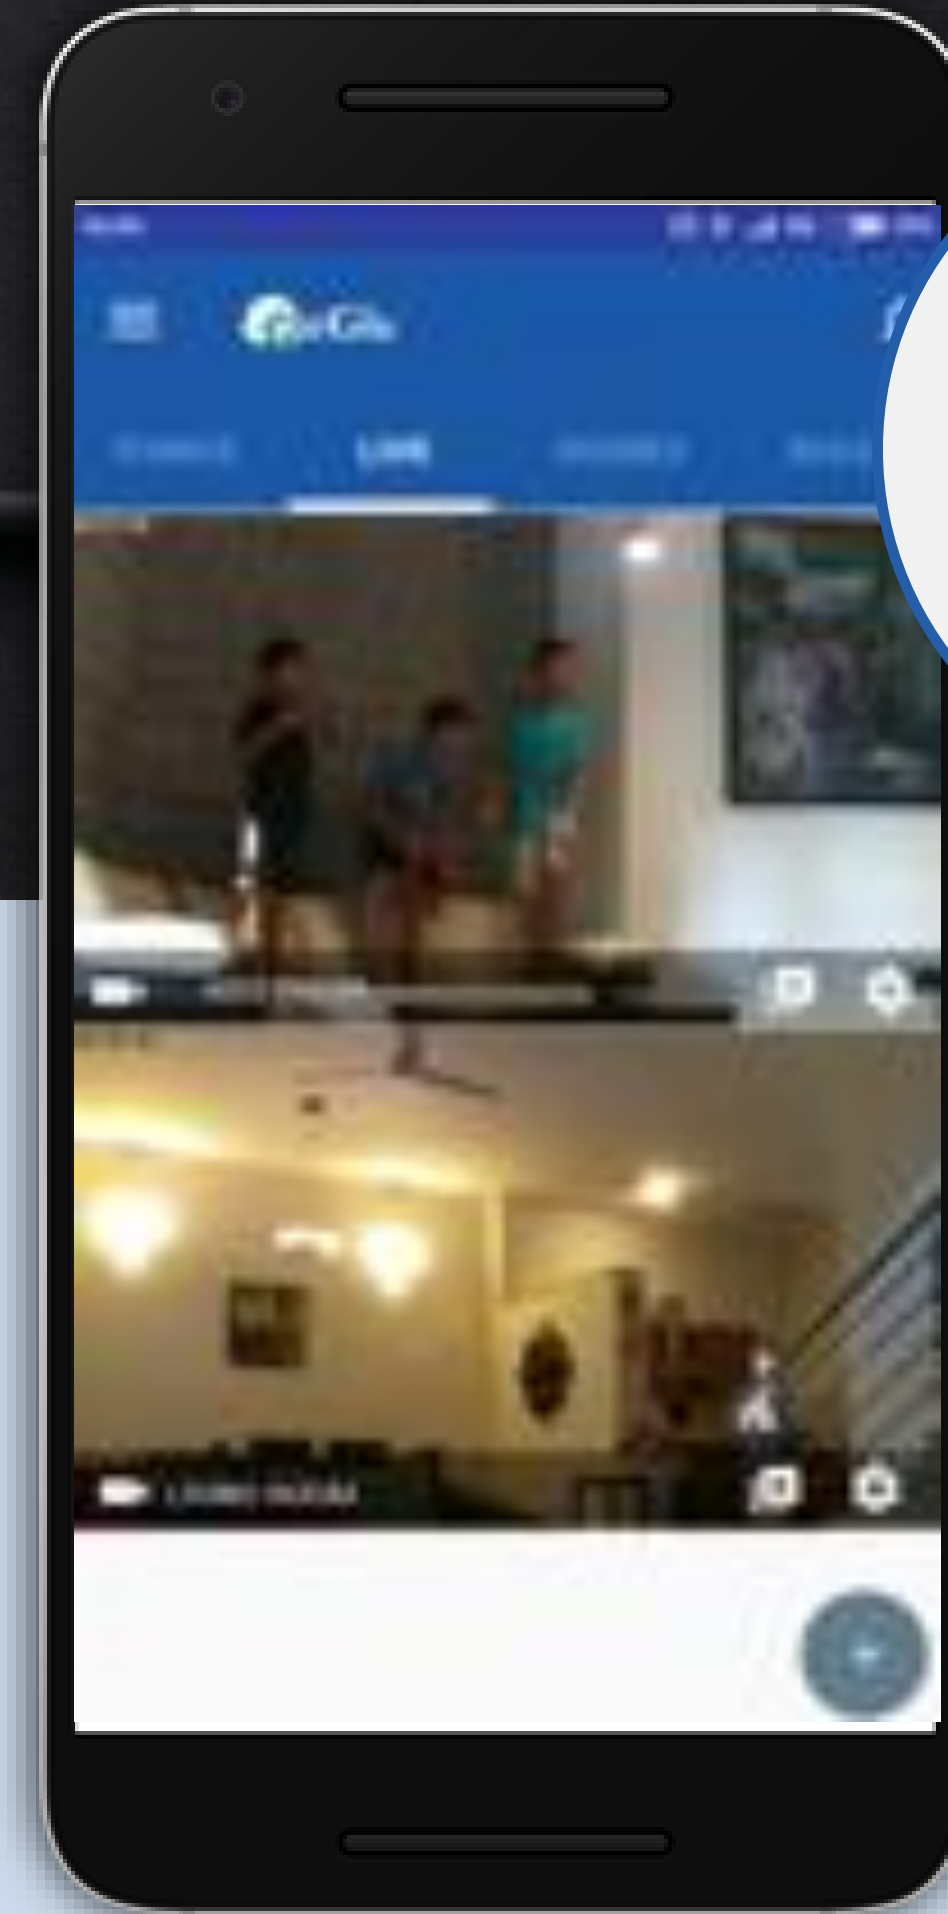

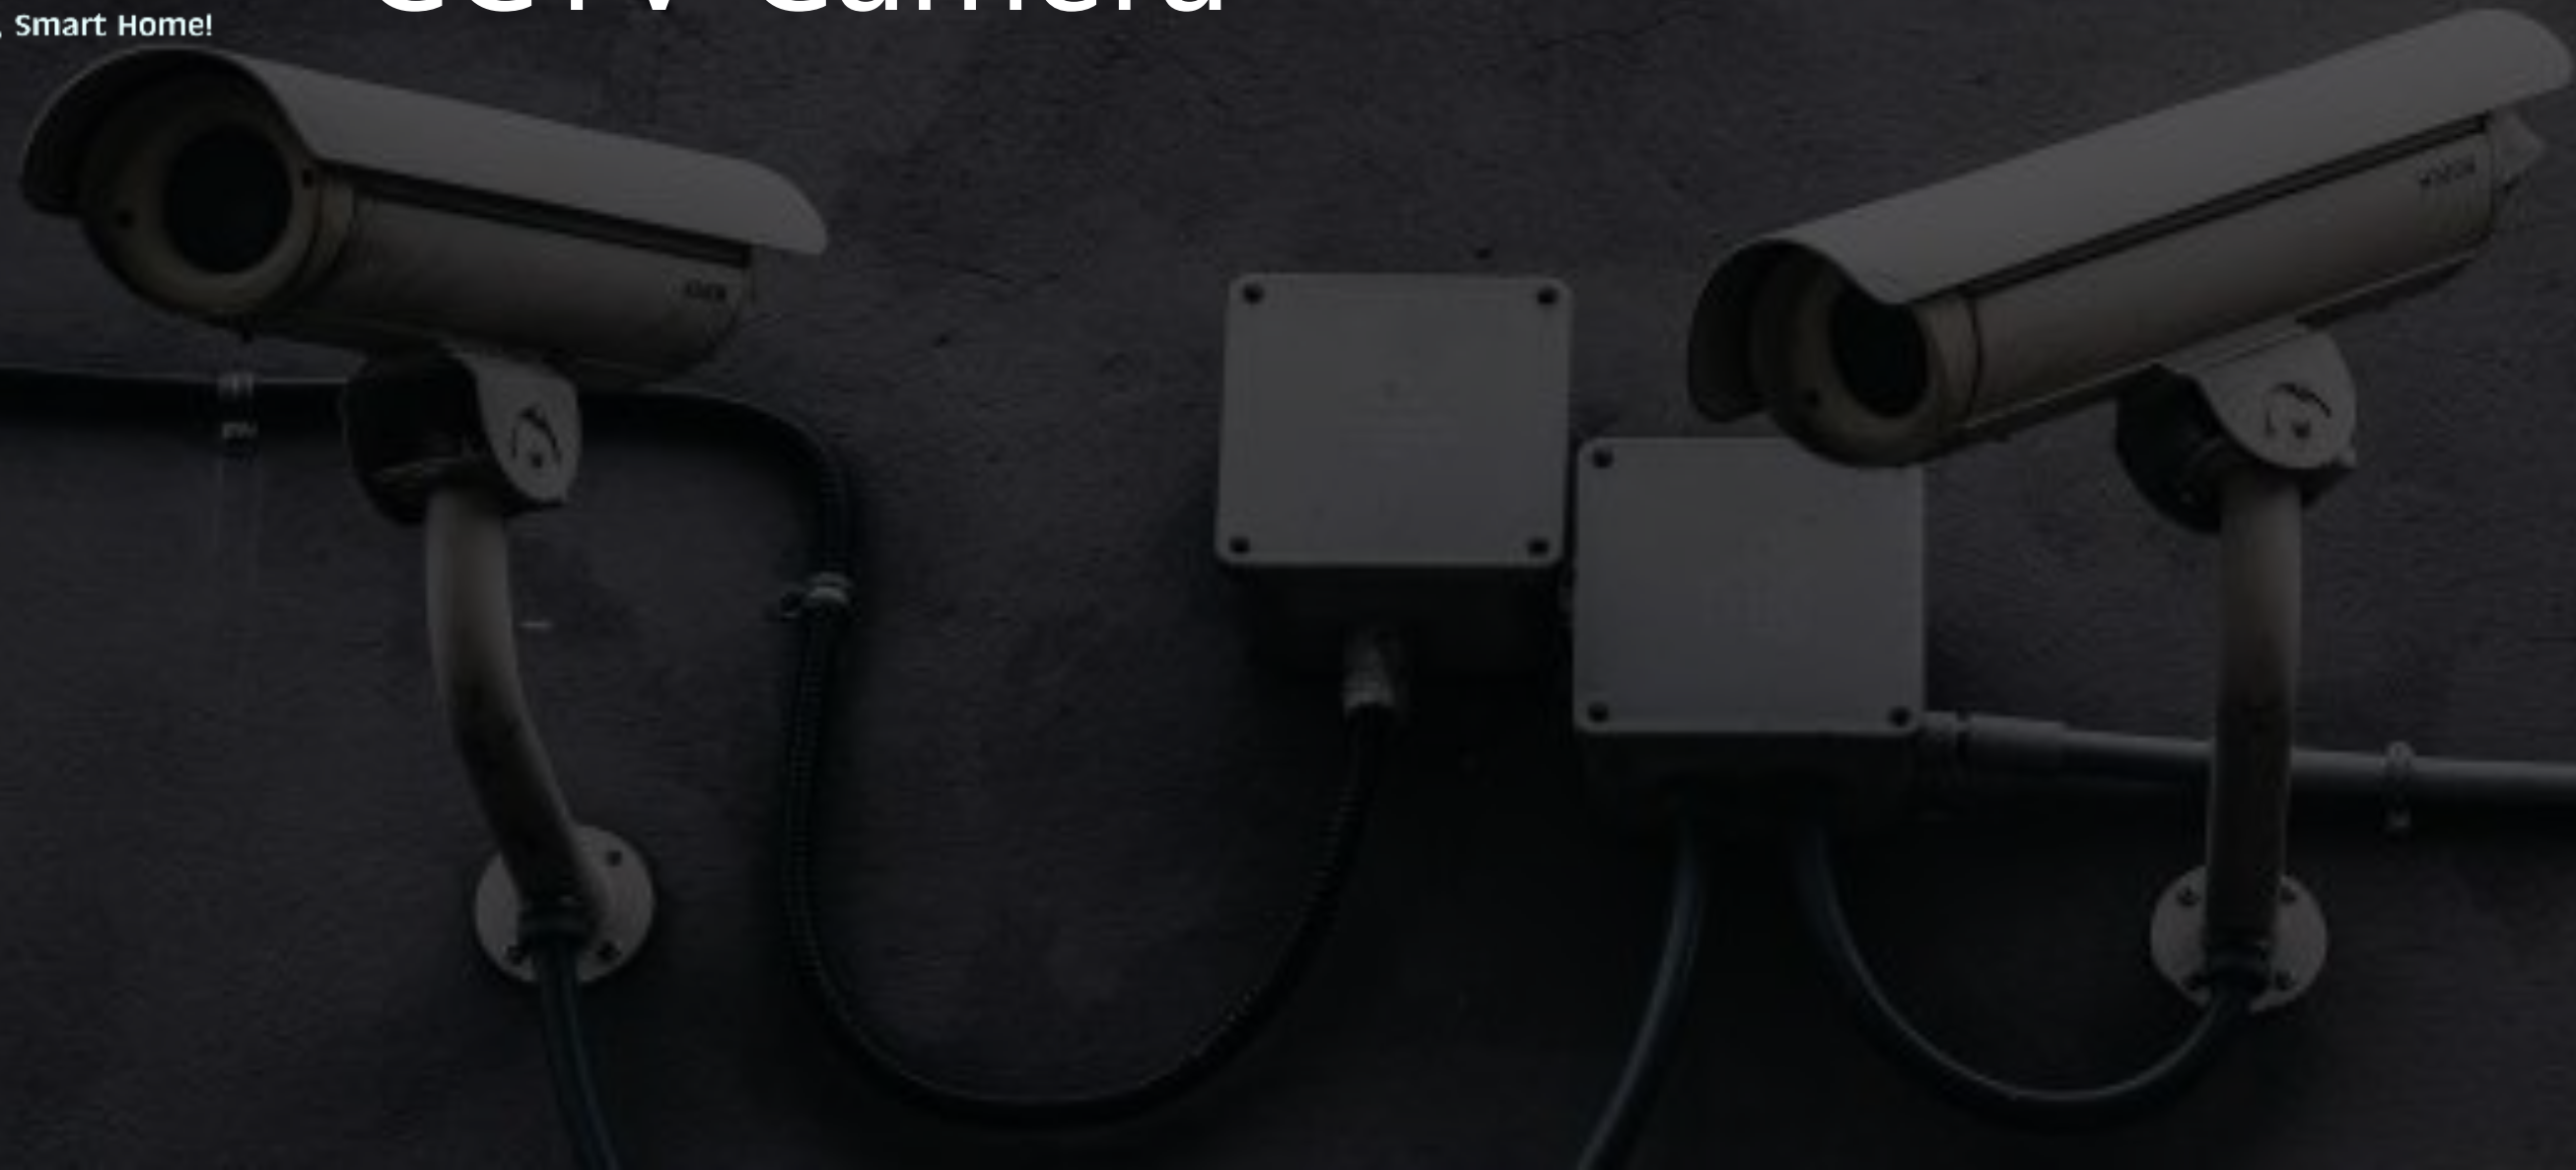

Lock Controller

Yale Locks are supported on eGlu and lets you take complete control on the door lock. Secure your home by knowing the real time status of the door lock on the eGlu app. It can do much more than normal door open/close operation and lets you create new users on the lock or change an existing lock pin.
